Cuillins Wood Project Report April 2018-March 2019

Thanks to the kind encouragement of woodland owner, Cathy Swires, we have recently entered our second year of offering woodland sessions for families with children from 3-13. After the first trial session in April 2018, we held three sessions in the 2018 summer holidays, and have since had a session towards the end of each school half-term and term holiday. This included a successful Twixtmas session. We have been experimenting with the activities and format of the sessions, whilst adding more features to the site, as well as regularly clearing and keeping it safe. We have also tried various approaches to spreading the word about the sessions, some successful, others less so. Importantly, we have a small core of regular contributors some of whom are willing to take over project co-ordination from the Chair and Vice-Chair (who will continue to contribute), and have loads of ideas for developing the project further. Watch this Open Space!
